

CNG SUPPLY

Natural gas is considered one of the most promising alternative fuel for its cleanliness and abundance. With a growing concern for the environment, there is a global awareness for the use of natural gas as fuel for power and steam generation.

Our Natural Gas Compression Station is located at KM 5, Itokin Road, Ikorodu. The gas is compressed to pressures of up to 250 bar into Jumbo Tube Skids and transported on road to locations which do not have piped gas.

Our present compression capacity is 120,000 Standard Cubic Meters (SCM) per day.
