

MW123E

MW123E Single-phase GPRS Smart Credit Meter

MW123E

MW123E Single-phase GPRS smart credit meter is a direct connected active energy metering equipment. It adopts the latest integrated circuit technology and advanced software algorithm to realize active energy metering.

Basic Functions

- Event Recording
- Auto detection.
- Reverse consumption measured as forward.
- Demand calculation
- Detect grid parameters including real-time power, voltage, current and power factor.
- Wake up by pressing button on power outage.

Options

- Real time clock (RTC)
- Multi tariff
