

# MN123E

## MN123E Single-phase Normal Credit Meter

### MN123E

MN123E single-phase normal credit meter is an active electric energy meter of direct access type. It adopts the latest IC technology and advanced software algorithm, design and manufacturing, which conforms to IEC standards and can realize active energy measurement for single user.

### Basic Functions

- Active energy measurement
- Reverse energy (A-) can be measured in forward way (A+)
- Measure real-time data like active power, voltage, current, power factor.
- Tamper detection
- Max. demand
- Load profile data of Voltage & Energy.
- Manual and Auto billing
- LCD display.

### Options

- Real time clock(RTC)
- Multi tariff
- Electrical pulse output
- Display when power-off
