

MW343D

MW343D Three phase GPRS Smart Credit meter

MW343D

MW343D three phase GPRS smart credit meter is a kind of a new generation smart energy meter. Based on MCU with the metering chip, the meter adopts the latest integrated circuit technology and complies with IEC standards.

Basic Functions

- Max. Demand measurement.
- Clock, time-interval and tariff
- Measurement and monitoring
- Event Recording
- Load profile
- Data frozen
- Harmonic analysis
- Optical and RS485 Communication
- Powered-off Meter-reading
- LED indication and pulse signal output
- Multi-functional test Interface
- Meter dormancy at Power Off
- Load switch

Options

- Public network communication
