

MN343D

MN343D Three-phase normal credit meter

MN343D

MN343D three-phase normal credit meter, an active and reactive energy measuring meter, applies the most advanced circuit manufacturing techniques and software measurement, complying with IEC standards.

Basic Functions

- Measurement of active and reactive energy
- Maximum demand
- Reverse energy (A-) can be measured in forward way (A+)
- Programmable Auto scroll mode display
- Optical communication port (1107)
- Pulse test outputs
- Event logs
- Tamper detection

Options

- Real time clock (RTC).
- Multi tariff (8 Tariff Registers)
